

## Bar Grilles

### Description

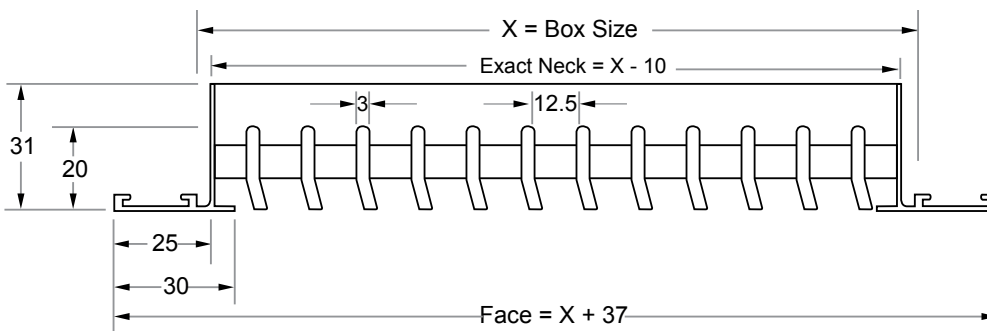

For supply or return air, most suitable for wall applications. Bar Grilles are available in many different styles, such as fixed core, removable core, hinged core, reverse angle and flangeless. They are also available with different blade spacing, depending on the requirements. Bar Grilles are available in both 15 and 0 degree deflection. Available in natural anodised, white or any special colours upon request.

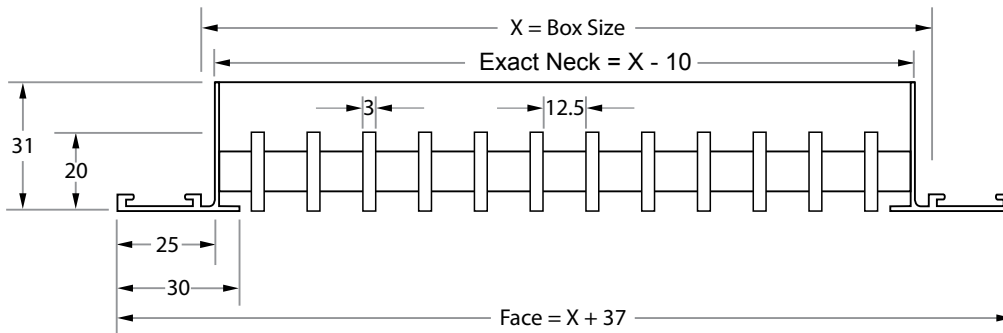

### Construction

From extruded aluminium sections. Hairline mitred joints mechanically held. Blades are spaced at 12.5mm as standard, however also available in 6mm, 9.1mm and 10.4mm upon request. Round spacers form the mullions for support between blades.

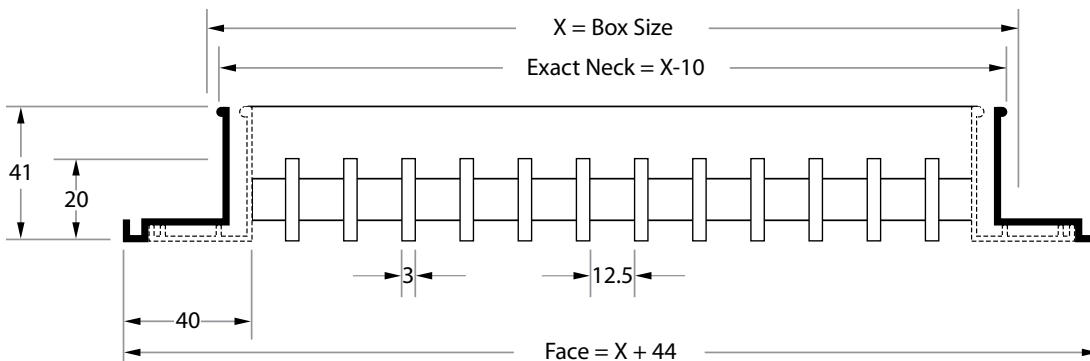

### 15 Degree Deflection

### 0 Degree Deflection

### Removable Core Bar Grille
