National Air Parts

Total comfort for all weather conditions...

We are a 100% Australian owned and operated company. We offer the most innovative and current airconditioning components ensuring quality products for your total comfort. At National Air Parts we stand by our name by offering a 20 year warranty on all products we manufacture—just take a look at some of our range.

JET DIFFUSER

Designed to throw air directly down. Perfect for high ceilings or void areas.

SWIRL DIFFUSER

Encourages optimum mixing of heated or cooled air with room air by way of fixed rotated jets at a downward angle, directing air away from the ceiling eliminating possible drafts.

MULTICONE DIFFUSER

Designed to evenly distribute air with the ability of a three position setting for extra comfort.

SINGLE CONE ROUND DIFFUSER

Very similar air patterns to the multicone diffuser although very different in appearance. The diffuser can also be manually shut off when a room is not being occupied. Available in a metal or plastic finish.

MULTI DIRECTIONAL DIFFUSER

Designed to throw air in any direction of your choice. Each of the four face sections is removable which makes cleaning a breeze. Available in both fixed and adjustable blades.

BEVELLED EDGE DIFFUSER

The classic original from the diffuser family. Available in 1 way, 2 way, 3 way and 4 way blow patterns. Available in metal finish only.

FLOOR GRILLES

Designed to distribute air from the floor area of a room when under floor airconditioning is installed. Available in a variety of colours both plastic and metal.

DECORATIVE FLOOR GRILLES

The floor grille with that extra touch of class available in a variety of designs and colours. Perfect for timber floors.

ZONE CONTROLS

Zoning solutions for all applications. Your options are unlimited.

LINEAR SLOT DIFFUSER

Designed to take heat loads off large glass areas. Can also be applied to conventional ceiling and bulkhead applications.

LINEAR BAR & DOUBLE DEFLECTION DIFFUSERS

Designed typically for bulkhead applications where air is required to travel across a room. Linear bar diffusers can also be used as a floor grille.

RETURN AIR GRILLE

Designed to pull stale air through the filter from within your home and return it as conditioned air. Also available with electrostatic filter for the allergy conscious.

FLEXIBLE DUCT

Regarded as the most important auxiliary item of an airconditioning system. All National Air Parts flexible ducting is assembled using only the finest Australian made materials. It is UV stabilised, fire rated and insulated with a 40-80mm R.1 thick pillow safe polyester. So you can be assured that your installer is using only the best (R.1 optional).

BRANCH TAKE OFF

Designed to distribute cold and hot air through to designated areas. Constructed from a tough corrosive resistant galvanised body with a thick layer of foam form polyurethane insulation.

HEAVY DUTY DURAZONE

Constructed from a tough corrosive resistant galvanised body and wrapped with thick foil faced insulation. Complete with a robust high torque motor as the name suggests this heavy duty damper has been built to last.

Official Test Certificate

National Air Parts flexible duct has been tested and has passed all requirements of AS 4254 - 1995 AMDT.1 - 1996 and UL 181 for use in domestic and commercial Air Handling Systems.

TERMS AND CONDITIONS

1. This warranty covers National Air Parts Pty Ltd (NAP) insulated and uninsulated flexible ducting.
2. The flexible ducting must be installed in accordance with NAP procedures and incorporates associated HVAC components and products supplied by NAP.
3. The warranty covers only the affected portion of the installation and is limited to replacement of parts only. Removal and re-installation costs are not included.
4. The warranty will only apply if appropriate flexible duct support mechanisms are in place, in either ceiling or underfloor applications, and the flexible ducting is taped correctly to all connections.
5. This warranty does not cover damage caused by birds, animals, insects or acts of God, misuse, abuse, or negligence.
6. NAP flexible ducting needs to be stored or installed in a dry environment. Warranty will be void if damage occurs in exposed weather conditions, direct sunlight or damp environments.
7. Warranty claims will only be recognised if:
 - The warranty certificate is completed at the time of installation and certificate details are forwarded to NAP within one month of installation.
 - Claims are inspected by NAP representatives in situ, and no changes to the original installation have occurred.
8. The warranty applies only to the original purchase.
9. Warranty will be rendered void if installed by an unlicensed installer.
